Where Science Goes to Work

- Tenants: Analytical Bio-Chemistry Laboratories, Inc., is building its headquarters, a 85,000 square-foot, \$15 million pharmaceutical research facility. The University's Research Animal Diagnostic Laboratory, or RADIL, also will open its new building at the park. RADIL provides research in animal infection diseases, fertility techniques and infertility problems.
- Location: The park is on the site of the South Farm, a 1,452-acre University of Missouri-Columbia agriculture experiment station just three miles from campus and near Columbia Regional Airport. A life science business incubator is in development in close proximity to the park.
- With \$2.2 billion in total revenues and more than 23,000 employees, the University of Missouri is the 21st largest publicly-held company in the state.
- The University's federal research and development funding grew from \$159 million in FY96 to more than \$302 in FY05. The University conducts five dollars of research for every dollar directly invested by the state.

Mizzou Impact

- One of only six public universities in the country with medicine, veterinary medicine, law, engineering and agriculture all on one campus.
- Home to a \$60 million Life Sciences Center and the world's most powerful university research reactor.
- Ranks first among all institutions in the Association of American Universities in the growth of federal research funding over the past decade.

Columbia, MO

- Home to University of Missouri-Columbia and two private colleges.
- Centrally located between St. Louis and Kansas City, with easy access to I-70 and Highway 63.
- Consistently listed among the top U.S. cities by national magazines and organizations.
- Excellent public school system.
- Access to quality health care.
